## Background

### Objectives, Purposes and Values of the association

The objectives of the association are

- i) Initiate and direct cutting edge research into broadacre farming and grazing practices aiming to improve environmental sustainability, productivity and profitability in higher rainfall environments.
- ii) Identify, develop and promote best practice farming techniques in high rainfall environments.
- iii) Encourage the sharing of information and resources by involving the wider community and industry in Group activities, including business and students, enabling Group outcomes to be communicated throughout the region.
- iv) Generate strong links with government, natural resource management, academic and commercial sectors.
- v) To promote the importance of broadacre agriculture to the region and promote regional agriculture to the wider community

### Management

All policies and activities are managed by a capable and experienced management committee which includes a wide range of talents.
